New Employee Onboarding Plan v2

Operating standards for the second half of 2026

Document ID: HB-HR-ONB-02 | Approval date: 2026.06.12 | Effective date: 2026.07.01 | HR Operations Team

This document replaces v1. It applies to 12 employees joining in July: 8 working on site and 4 working remotely.

Current situation: Differences in training instructions across departments lead to repeated questions during the first week. Goal: Achieve 100% completion of all 5 mandatory training courses during the first week and provide a consistent way to contact the responsible staff.

Mentoring lasts for 2 weeks after joining. Changes to the operating schedule are incorporated following additional requests from the Head of HR Operations.

New Employee Onboarding Plan v2 - continued

Schedule and responsibilities

When	Activity	Responsible team or person
3 days before joining	Account setup and equipment preparation	IT Support Team
First day	General orientation and security training	HR Operations Team
First week	5 mandatory training courses and role introduction	HR Operations Team and home team
2 weeks after joining	Mentoring and questions and answers	Home-team mentor
4 weeks after joining	Settling-in check	HR Operations Team

The IT Support Team handles connection problems. Mentors collect and answer role-related questions 2 times a week. The HR Operations Team oversees the programme.

Risks and responses

Account setup delays: Check the preparation list 3 days before the start date and send unfinished items to the IT Support Team.

Missed training: Check completion of all 5 courses on the Friday of the first week and provide make-up sessions for anyone who has not completed them.

Missing information for remote participation: Apply the B02 remote onboarding supplement as well. This plan and the supplement apply together; the supplement does not replace v2.

Preparation and operating checks for team leads

Participants: 12 employees joining in July (8 on site, 4 remote). The HR Operations Team finalises the list of new employees by home team 5 days before their start date. Team leads confirm the mentor and the time for the first-week role introduction 3 days before the start date.

The 5 mandatory courses are information security, personal data protection, health and safety, ethics, and collaboration tools. The goal is to complete all of them by the Friday of the first week. The HR Operations Team checks completion and agrees make-up schedules with home teams for anyone who has not completed the courses.

Repeated questions during the first week have centred on account access, training links, and how to contact responsible staff. All teams use the same training instructions and organisational directory; departments do not issue new, separate instructions.

Mentors collect and answer role-related questions 2 times a week for 2 weeks after joining. The HR Operations Team conducts a separate settling-in check 4 weeks after joining. Mentoring and the settling-in check are separate activities on different schedules.

Preparation status and handling problems

Preparation check on June 26: Account setup is complete for 10 of the 12 employees; 2 are awaiting permission approval from their home teams. The IT Support Team checks the approval status again no later than 3 days before the start date. These figures describe preparation status and do not change the number of new employees or the training goal.

Equipment delivery plans are registered for the 4 remote employees. Receipt is confirmed by the day before joining. If delivery is delayed, the IT Support Team and the home team discuss available replacement equipment.

Account setup delays: The IT Support Team shares the list of unfinished items and the expected resolution time. Missed training: The HR Operations Team checks completion on Friday and arranges make-up sessions. Missing role guidance: The home-team lead passes the list of questions to the mentor.

The team-lead meeting reviews participant numbers, the first-week training goal, preparation before joining, 2-week mentoring, the 4-week settling-in check, and each responsible team's response. Apply the B02 guidelines alongside this plan for the additional steps needed by remote employees.
