Remote Employee Onboarding Supplement

Additional arrangements for remote participation

Document ID: HB-HR-REMOTE-01 | Approval date: 2026.06.15 | Applies to: 4 new remote employees

Apply together with B01 Onboarding Plan v2. Follow v2 for participant numbers, training goals, and the mentoring period.

Ship equipment to remote employees 3 days before joining. Send VPN setup instructions and training access links the day before joining. The existing procedure does not schedule a separate connection check on the first day.

The IT Support Team handles reports of connection problems. If these cause an employee to miss training, the HR Operations Team arranges make-up sessions. Use the IT Support Team contact listed in the organisational directory.

Remote Employee Onboarding Supplement - continued

Participation steps for remote employees

3 days before joining: The IT Support Team checks equipment shipment records. Home-team leads confirm the delivery address and availability to receive the equipment with the new employee, then report back to the HR Operations Team.

The day before joining: The IT Support Team sends VPN setup instructions. The HR Operations Team sends links for the shared training and the schedule. Explain separately whom to contact about access problems and whom to contact about training schedules.

First day: Remote employees also attend general orientation and security training. The current schedule has no separate connection-check session. Employees contact the IT Support Team if they have connection problems; the HR Operations Team arranges make-up sessions for anyone unable to attend training.

Friday of the first week: The HR Operations Team checks completion of all 5 mandatory courses for remote employees using the same criteria as for on-site employees. Home-team mentors collect and answer role-related questions for 2 weeks.

The presentation should make clear who the remote procedures apply to and who is responsible for each step. These guidelines do not change the total number of new employees or the training goal.
