Create an onboarding presentation

You need a presentation explaining the July 2026 new-hire onboarding plan to team leads.

Using the current operating plan and the supplementary remote-work guidelines, create a PowerPoint draft (.pptx) of about six slides. Include the participants and goals, schedule, responsibilities, risks, and responses so team leads can prepare.

Save the draft in the Results folder and check that the file opens. A chat response or Word document alone does not count as a PowerPoint draft.

Return to this page and select Record draft progress. Once a PowerPoint draft is ready, you will receive a follow-up request. If you could not prepare one, record your progress and move to the next task.
