Revise the presentation

The HR Operations Lead has requested changes to the PowerPoint draft you just created. Find the draft or conversation in Wissly so you can continue working. Keep the original draft for comparison.

1. Change the mentoring period from two weeks to four weeks after joining. Update the schedule and any other slides that mention the same information.

2. Add a separate connection check on the first day for remote employees, with the IT Support Team responsible. Update any existing descriptions that conflict with this change.

Keep the key content that is not directly related to these two requests. Save the final PowerPoint file (.pptx) for the meeting in the Results folder, using a different filename from the draft.

When you finish or cannot continue, return to this page and select Record revision progress.
