2026 Q1 Business Performance

Approved business performance report

Document ID: HB-FIN-2026Q1-F | Status: Approved | Approval date: 2026.04.08 | Prepared by: Finance Management Team

The reporting period is 2026.01.01 to 2026.03.31. Use this report and the monthly appendix referencing the same document ID as the basis for the approved performance figures at the management meeting.

Revenue and operating profit are stated in KRW millions. Operating profit margin is operating profit divided by revenue, rounded to 2 decimal places for display. The overall margin is not a simple average of the divisional margins.

The 2025 Q4 report is for trend comparison. The 2026 Q1 review draft contains figures that have not been approved and must not be included in the performance figures for this meeting.

2026 Q1 Business Performance - continued

Approved performance by division

Division	Revenue (KRW millions)	Operating profit (KRW millions)
Solutions	1240	136
Services	980	76
Global	760	52
Total	2980	264

Solutions is responsible for implementation projects, Services for maintenance and operations, and Global for overseas business. The figures for all 3 divisions in this report have been adjusted for internal transactions.

Add the 3 divisions to obtain the total. No exchange-rate recalculation or conversion from KRW millions to KRW is required.

Aggregation and approval history

Adding the January-March figures in monthly appendix A02 for each division gives the figures on page 2 of this report. Sum the amounts using the units shown in the monthly table.

The Solutions revenue of KRW 1,280 million in the April 3 draft included a cancelled contract worth KRW 40 million. The approved version excludes this contract and also adjusts the related operating profit.

The modification time of the draft saved again on April 10 does not indicate its approval status. Check both the approval status and the reporting period inside the document.
