Equipment Quality Follow-up Plan

Follow-up plan for July-September 2026

Document ID: HB-QA-2026-FOLLOW | Approval date: 2026.07.06

The additional follow-up period is 3 months, from July to September 2026. The Quality Management Team records the numbers of inspected and defective units each month.

The October review meeting determines whether the level of improvement has been sustained. Before then, do not report that the long-term effect has been confirmed.

Source data compilation: Quality Management Team. On-site actions: Production Engineering Team. Final review: Head of Production.
